Arrrrhh! Pirate Frame

YOU WILL NEED:

Pegboard:
- Super-size

Other:
- Photo
- Tape
- Magnetic Tape (optional)
- Black shoelaces (optional)

Bead Colors:
- Black - 230
- Yellow - 57
- Glow in the Dark Green - 51
- Fire Stripe - 47
- Rust - 196

Instructions

1. Slide the actual-size pattern underneath the pegboard, then place your beads on the pegboard as shown.

2. Ask an adult to fuse your designs—see page 2 for further instructions.

ASSEMBLY

Trim the photo to fit within the opening of the pirate's face. Tape in place from the back. Set the finished frame on an easel to display it.

If you have an existing photo in a metal frame, you can attach the pirate face to the frame with magnetic tape, or display it on a fridge in the same manner.

If you wish to use the pirate head as a mask, add shoelace ties between the beads on each side.

Fusing Instructions—Only Adults Iron

1. Place your pegboard on a flat, heat-safe surface.

2. Set a household iron to the medium setting. Place ironing paper over the pegboard. In a circular motion, begin to iron the project. Do not press down with the iron. As the beads begin to fuse, you will see circles of the beads start to show through the paper. When ironed properly, the beads will still have an open center. Let the design cool.

3. Remove the paper and bead design from the peg board. Flip the design over to expose the non-fused side. Repeat step two. Let cool completely.

Beads need heat for about 10-20 seconds per side to fuse evenly. Lift the paper occasionally to see how the beads are fusing. Depending on the size of the project, additional heating time may be required. DO NOT OVER-IRON the beads as it will make the centers of the beads close and can make any assembly you do with your project more challenging.
