

**Instructions**

1. Using the small square pegboard, place all the beads for your project.
2. Cover the completed design with the ironing paper. Keeping the iron level, gently iron the beads in a circular motion for about 10 seconds to fuse the beads evenly. Ironed properly, the beads will still have an open center. On a 3-D project such as this, DO NOT OVER-IRON the beads as it will make the centers of the beads close and can make assembly difficult.
3. Once the design is cool, peel off the ironing paper. Lift your design from the pegboard; flip the design over and repeat step #2. Your pegboard and ironing paper are reusable.

**NOTE:** You will also need 24" of 20-gauge copper wire and a pencil to complete your project.

Continued on next page

Cut the wire in half, one for each leg.  
Wrap the wire around the pencil as  
shown to create a coil for each leg.

Insert one end of each coil through a  
bead at the bottom of the belly, and the  
other end through a bead at the rear of  
a foot. Bend the wire to secure.
