

YOU WILL NEED:

Pegboards:

- Small circle
- Daisy

Other:

- Scissors
- White sheet
- Adhesive foam (optional)
- Needle/thread (optional)

Bead Colors:

- Magenta - 73
- Purple - 81
- Black - 118
- Glow in the Dark Pink - 26
- Glow in the Dark Orange - 72
- Glow in the Dark Green - 93
- Glow in the Dark Blue - 11

Instructions

1. Place your beads on the pegboards as shown. If you are using a clear pegboard, slide the actual-size pattern underneath it.
2. Ask an adult to fuse your designs—see page 3 for further instructions.
3. Assembly: You will create your Good Ghost, Bad Ghost costume with the bad ghost face on the front and the good ghost face on the back. When the ghost walks away, it will look as though it is walking backward!
4. Create eyeholes on the front of the sheet as you normally would so that the wearer can see. Working around the eyeholes, attach the pieces to create a bad ghost face.
5. You can use either adhesive foam or sew the pieces in place with a needle and thread. Have the wearer try the costume on and mark with a pencil where you want to position the good ghost face on the back. Add the pieces on the back in a similar way as the front.

Fusing Instructions—Only Adults Iron

1. Place your pegboard on a flat, heat-safe surface.
2. Set a household iron to the medium setting. Place ironing paper over the pegboard. In a circular motion, begin to iron the project. Do not press down with the iron. As the beads begin to fuse, you will see circles of the beads start to show through the paper. When ironed properly, the beads will still have an open center. Let the design cool.
3. Remove the paper and bead design from the peg board. Flip the design over to expose the non-fused side. Repeat step two. Let cool completely.

NOTE: Beads need heat for about 10-20 seconds per side to fuse evenly. Lift the paper occasionally to see how the beads are fusing. Depending on the size of the project, additional heating time may be required. **DO NOT OVER-IRON** the beads as it will make the centers of the beads close and can make the assembly you do with your project more challenging.
