

Mini Beads Skating Santa Snow Globe

YOU WILL NEED:

Pegboard:

- 4 Mini Beads square pegboards
- Small circle classic beads pegboard

Other:

- Mini Beads Tweezers
- Ironing paper & Iron
- 16 oz. clear glass mayonnaise jar
- Iridescent glitter
- Glue gun
- Red ribbon and trim

Mini Bead Colors:

- Sand - 6
- Red - 214
- Cheddar - 6
- Kiwi Lime - 19
- Black - 97
- White - 214

Classic Bead Color:

- White - 183

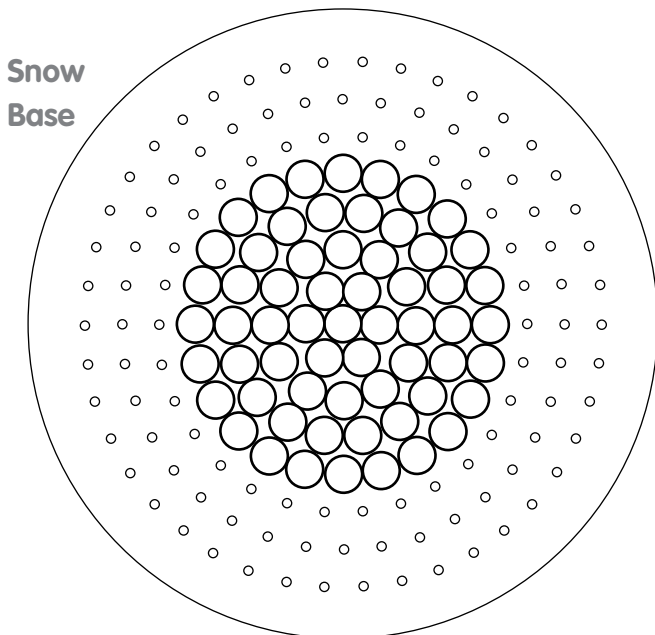

Instructions

1. Assemble the Mini Beads pegboards in a square. Slide the actual-size pattern under your clear pegboard and place your beads as shown. In a similar way, create the 3 snow base layers with classic beads.
2. An adult should fuse the designs—see page 2 for further instructions.
3. Assembly: see page 2.

FUSING INSTRUCTIONS

Only Adults Iron

1. Place your pegboard on a flat, heat-safe surface.
2. Set a household iron to the medium setting. Place ironing paper over the pegboard. In a circular motion, begin to iron the project. Do not press down with the iron. When ironed properly, the beads will still have an open center. Let the design cool.
3. Remove the paper and bead design from the pegboard. Flip the design over to expose the non-fused side. Repeat step two. Let cool completely.

MINI BEADS need heat for about 10 seconds per side to fuse evenly. Depending on the size of the project, additional heating time may be required. **CLASSIC SIZE BEADS** need approx 20 seconds per side.

ASSEMBLY

1. We used a 16 oz. glass mayonnaise jar for our snow globe. Other jars of the same ounce size may fit the design differently. Remove the label.

2. The snow base layers will lift the Santa in the jar to be visible and appealing. Feel free to adjust the size and number of layers for the jar you will be using.

PLEASE NOTE: To enable the Santa to fit properly inside the jar, the snow base layer that you make from the Mini Beads will need to be positioned off-center to the left. We recommend testing the position of the snow base pieces with the Santa in place and the fit into the jar before gluing the pieces in place. You may need to bend the Santa slightly at the edges during insertion into the jar.

3. When you are happy with the position of the pieces, glue them securely together and to the lid of the jar. Glue Santa into the foot slot of the Mini Beads snow base piece.

4. Fill the jar with water and add a healthy amount of iridescent glitter. Take the lid with Santa upside down and insert him into the jar. Twist lid on tightly. Gently turn the jar to start the blizzard!
5. Glue some red trim to the edge of the lid for decoration, and tie a piece a ribbon as a final touch.
