Print and cut out the tags you want to use on your popsicles.

1

If you are adding a tag or photo to your popsicle, place a thin line of glue where you will be positioning your tag. The paste-behind tags have an extra margin for you to place your glue. Weight the popsicle with a book until the glue is dry.

2

Add a thin line of glue where you will be placing the popsicle stick. Press the stick onto the glue and weight it with a book until dry. **NOTE: Do not insert a colored or painted popsicle stick into cake or other food.**

Fusing Instructions—Only Adults Iron

1. Place your pegboard on a flat, heat-safe surface.
2. Set a household iron to the medium setting. Place ironing paper over the pegboard. In a circular motion, begin to iron the project. Do not press down with the iron. As the beads begin to fuse, you will see circles of the beads start to show through the paper. When ironed properly, the beads will still have an open center. Let the design cool.
3. Remove the paper and bead design from the peg board. Flip the design over to expose the non-fused side. Repeat step two. Let cool completely.

NOTE: Beads need heat for about 10-20 seconds per side to fuse evenly. Lift the paper occasionally to see how the beads are fusing. Depending on the size of the project, additional heating time may be required. **DO NOT OVER-IRON** the beads as it will make the centers of the beads close and can make the assembly you do with your project more challenging.
