# **Pumpkin Family**

### YOU WILL NEED:

Pegboards: Bead Colors/# Needed:

Large Circle Glow in the Dark Green - 107

Large Square Black - 1239

O White - 243

You will also need foam adhesive or toothpicks.

#### Instructions

- 1. Place your beads on the pegboards as shown. If you are using a clear pegboard, slide the actual-size pattern underneath it.
- 2. Ask an adult to fuse your designs—see page 2 for instructions.

3. Assembly: Combine pieces as we have to create fun faces or combine them in a different way for your own unique look. Attach pieces to the pumpkin either using foam adhesive or toothpicks. If you use toothpicks, you can break them in half to make them shorter and color the end with a black marker so it's not noticeable on the face.

## **EYES**

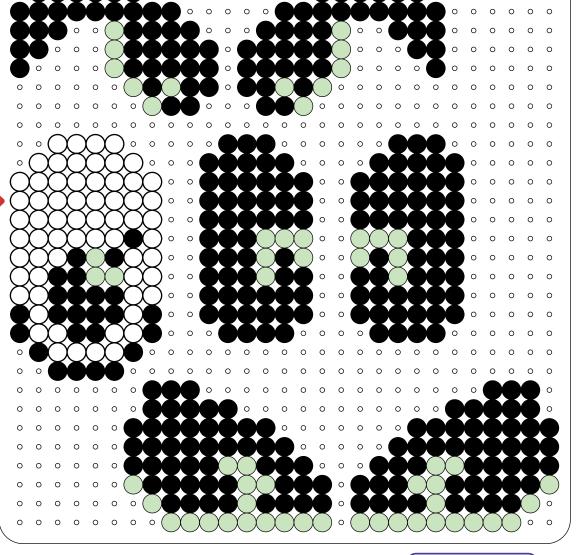

#### **Bead Colors:**

Glow in the Dark Green

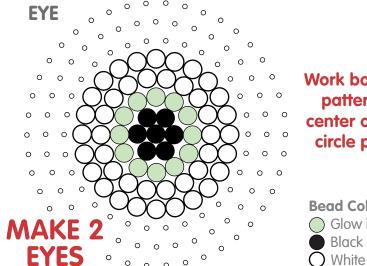

Black

O White

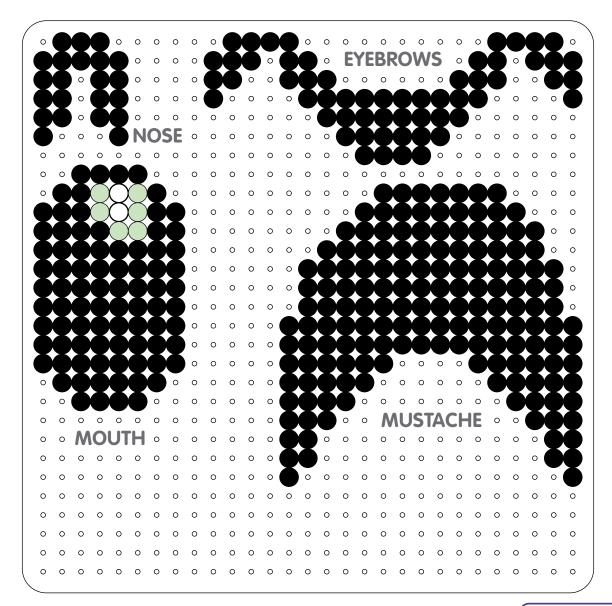

MAKE 2 of this eye —

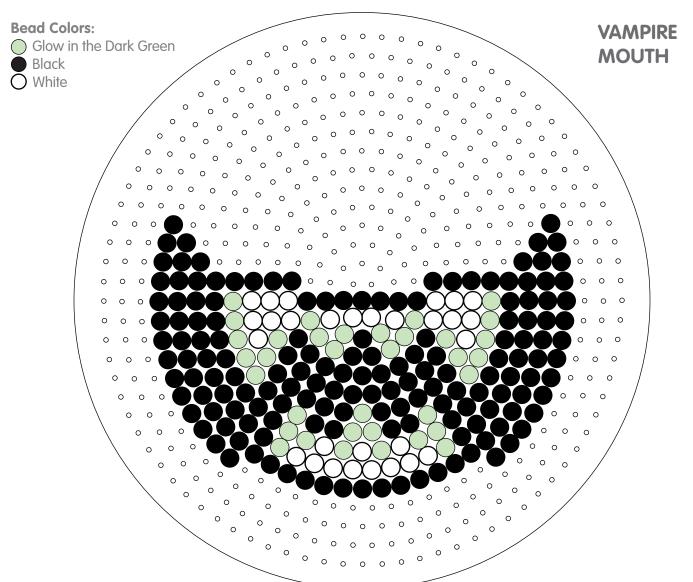

**EYEBROWS** & NOSE Work both of these patterns in the center of the large circle pegboard. **Bead Colors:** Glow in the Dark Green

Black

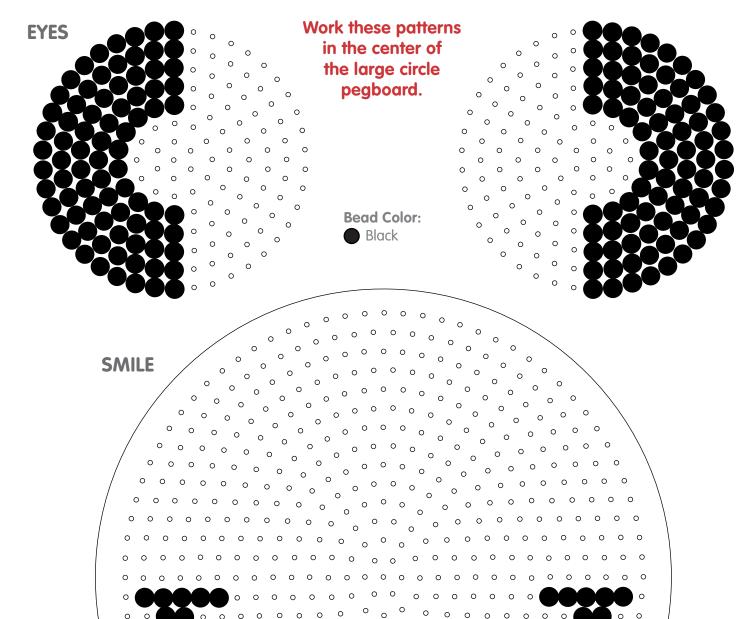

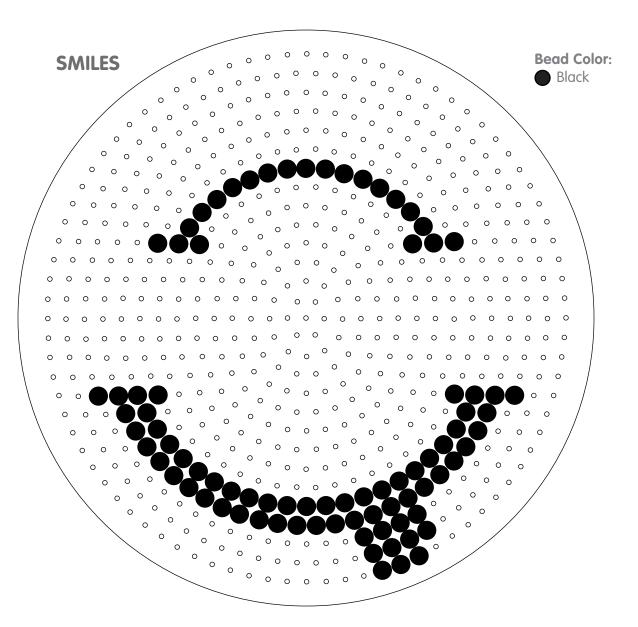

## Fusing Instructions—Only Adults Iron

- 1. Place your pegboard on a flat, heat-safe surface.
- 2. Set a household iron to the medium setting. Place ironing paper over the pegboard. In a circular motion, begin to iron the project. Do not press down with the iron. As the beads begin to fuse, you will see circles of the beads start to show through the paper. When ironed properly, the beads will still have an open center. Let the design cool.
- 3. Remove the paper and bead design from the peg board. Flip the design over to expose the non-fused side. Repeat step two. Let cool completely.

NOTE: Beads need heat for about 10-20 seconds per side to fuse evenly. Lift the paper occasionally to see how the beads are fusing. Depending on the size of the project, additional heating time may be required. DO NOT OVER-IRON the beads as it will make the centers of the beads close and can make any assembly you do with your project more challenging.
