

YOU WILL NEED:

Pegboards:

2 large squares

Other:

Paper clay: light yellow,
pink

Quick-drying adhesive

Bead Colors:

-  Butterscotch - 32
-  Pastel Yellow - 3
-  Cheddar - 85
-  Parrot Green - 297
-  Plum - 33
-  Purple - 640
-  Black - 52
-  Fire Stripe - 86

Instructions

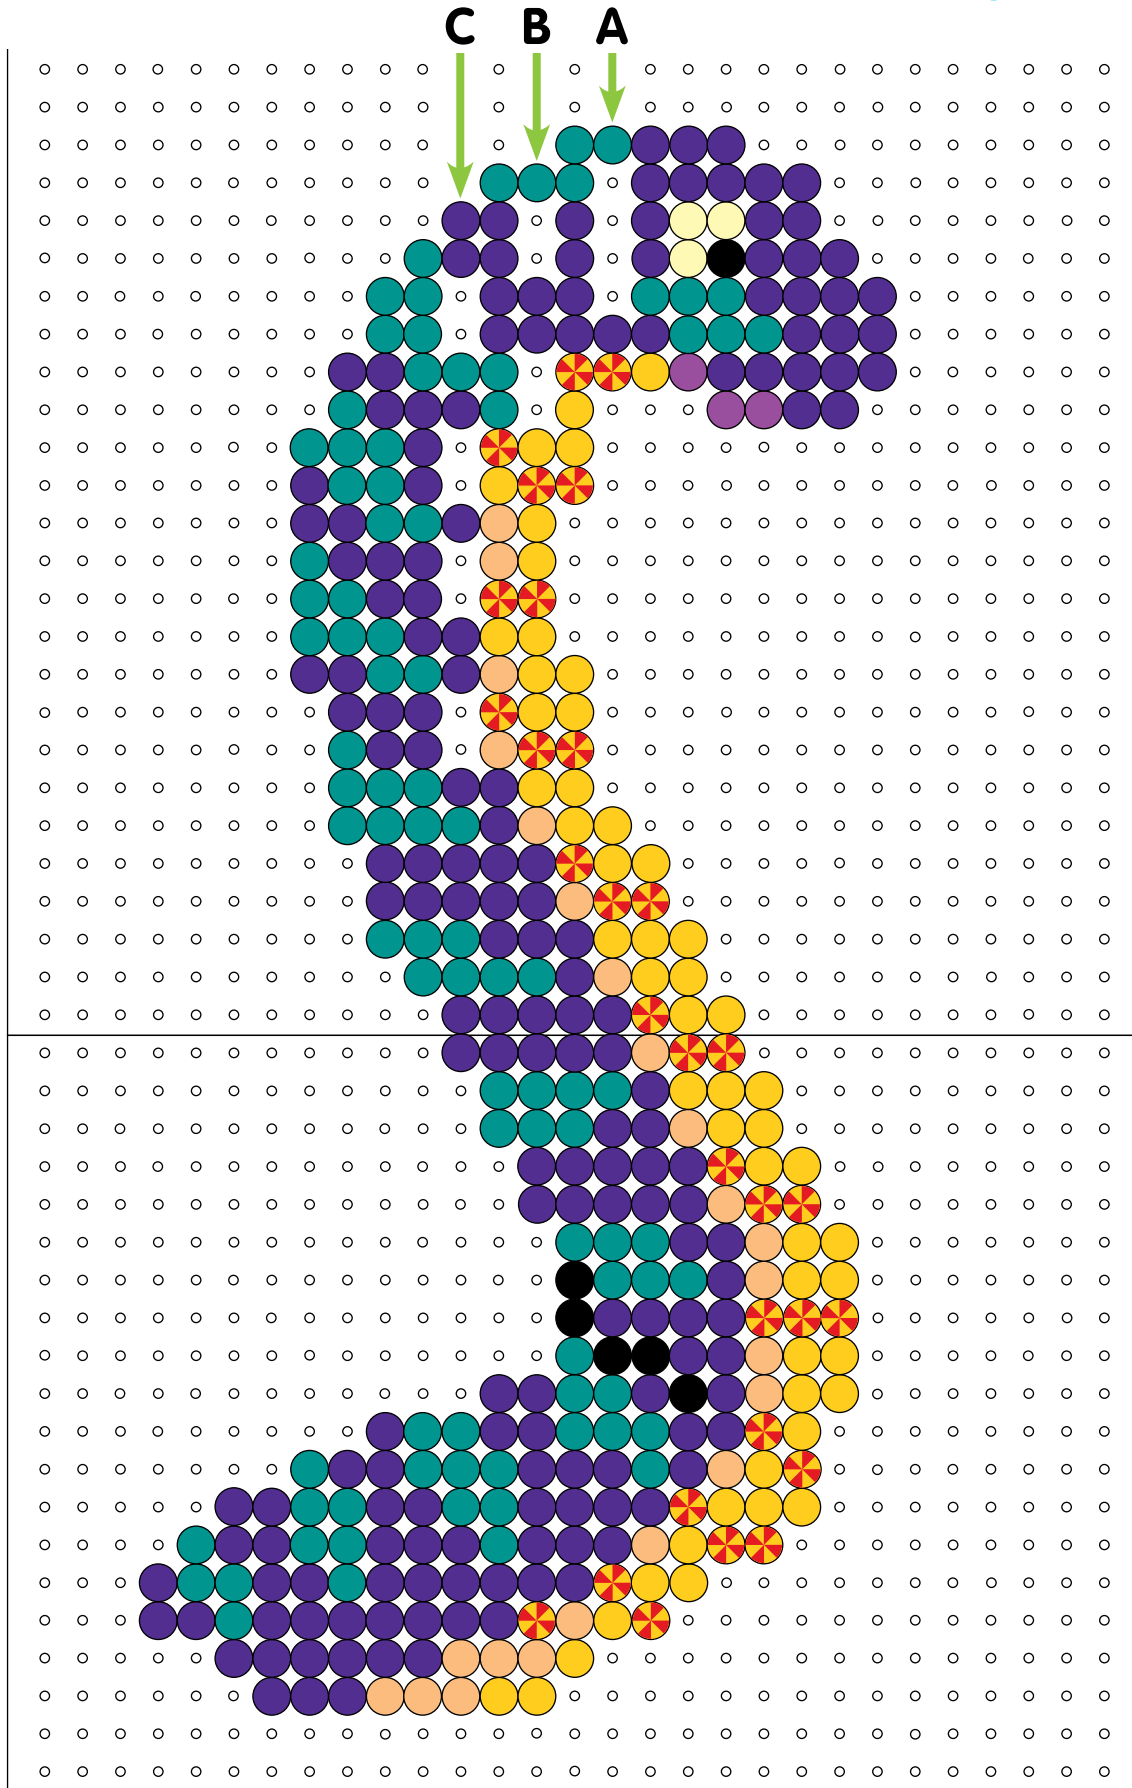

1. For the first pattern on page 2, connect both large squares and position them vertically on your work surface. Place your beads on the pegboards as shown. If you are using a clear pegboard, slide the actual-size pattern underneath it.
2. Ask an adult to fuse your designs—see below for further instructions.
3. Assembly: see page 5.

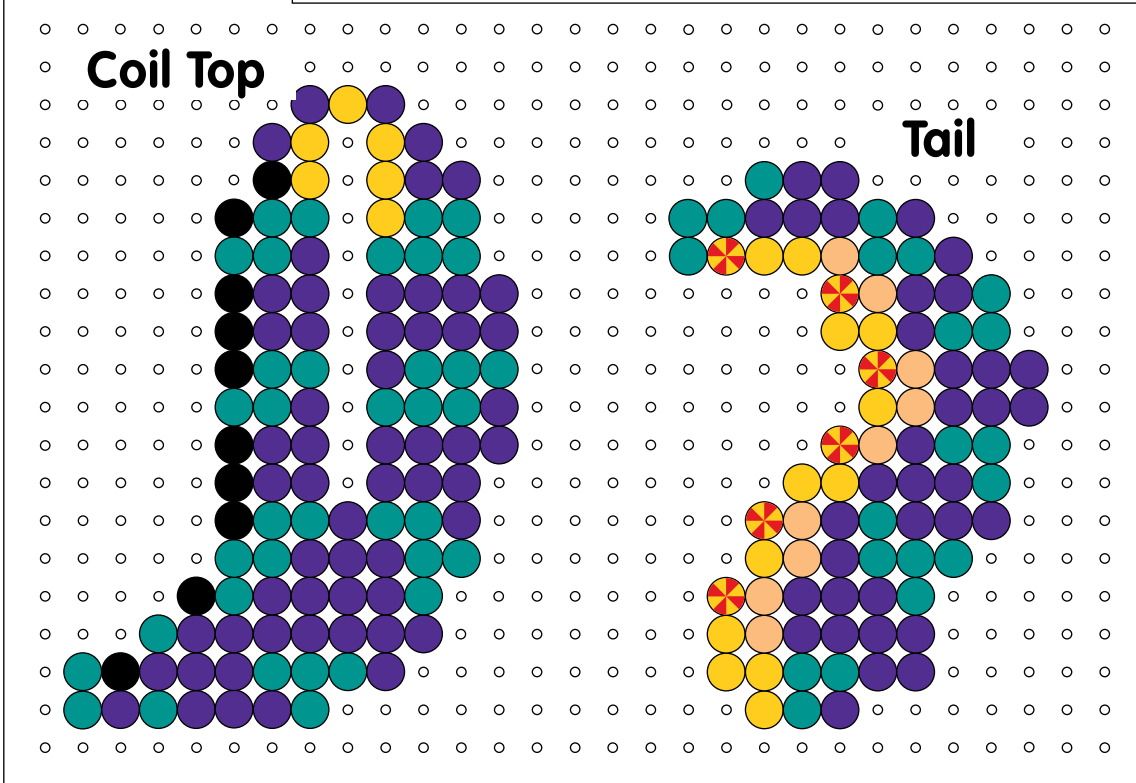

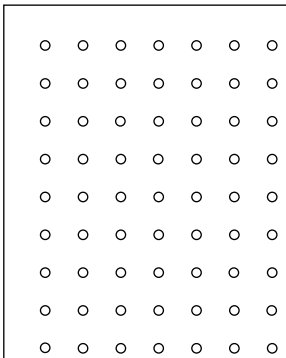

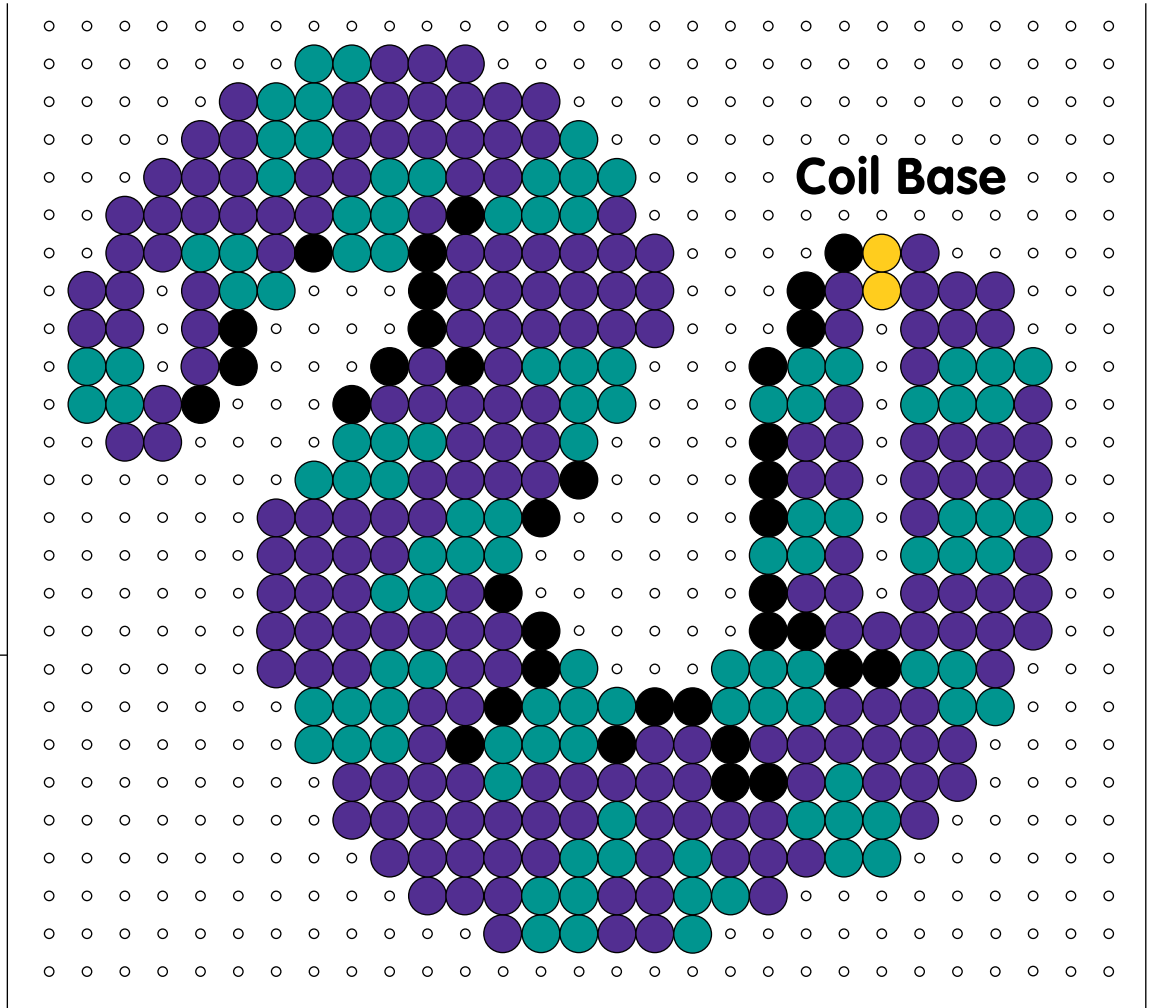

Fusing Instructions—Only Adults Iron

1. Place your pegboard on a flat, heat-safe surface.
2. Set a household iron to the medium setting. Place ironing paper over the pegboard. In a circular motion, begin to iron the project. Do not press down with the iron. As the beads begin to fuse, you will see circles of the beads start to show through the paper. When ironed properly, the beads will still have an open center. Let the design cool.
3. Remove the paper and bead design from the peg board. Flip the design over to expose the non-fused side. Repeat step two. Let cool completely.

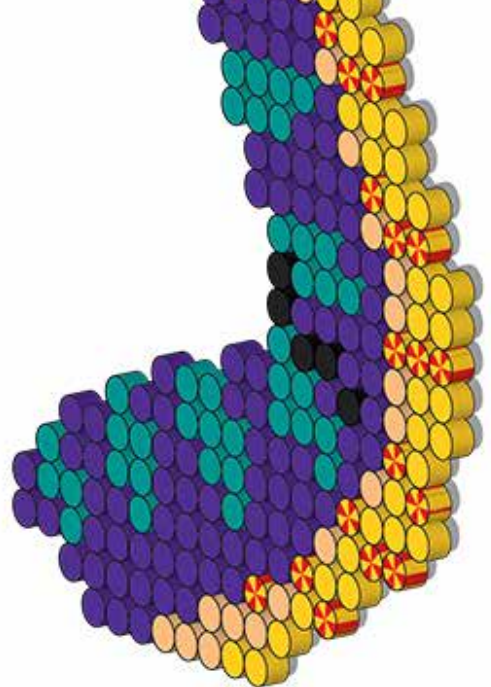

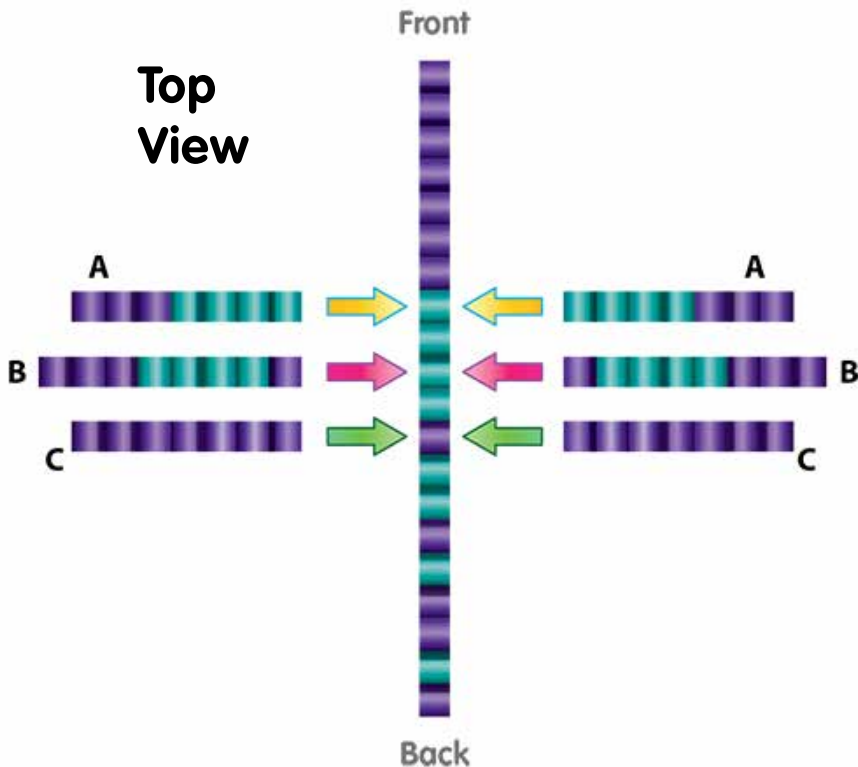

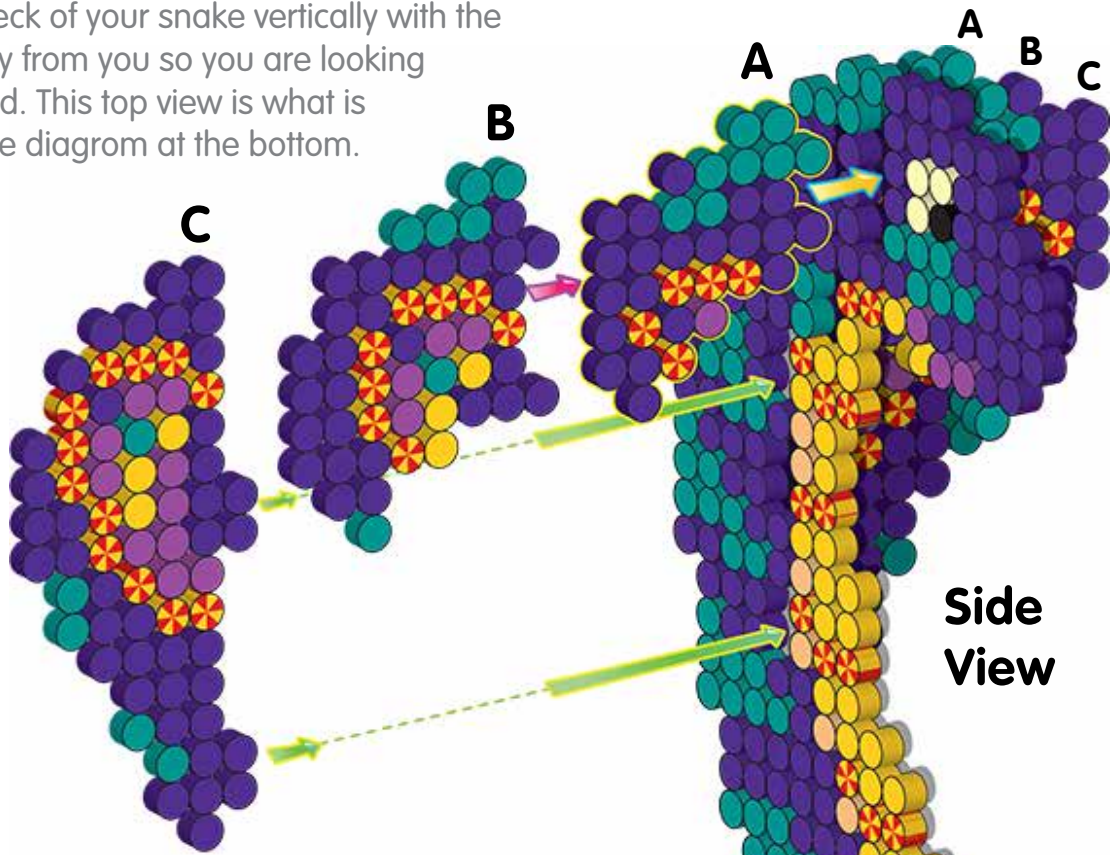

NOTE: Beads need heat for about 10-20 seconds per side to fuse evenly. Lift the paper occasionally to see how the beads are fusing. Depending on the size of the project, additional heating time may be required. **DO NOT OVER-IRON** the beads as it will make the centers of the beads close and can make the assembly you do with your project more challenging.

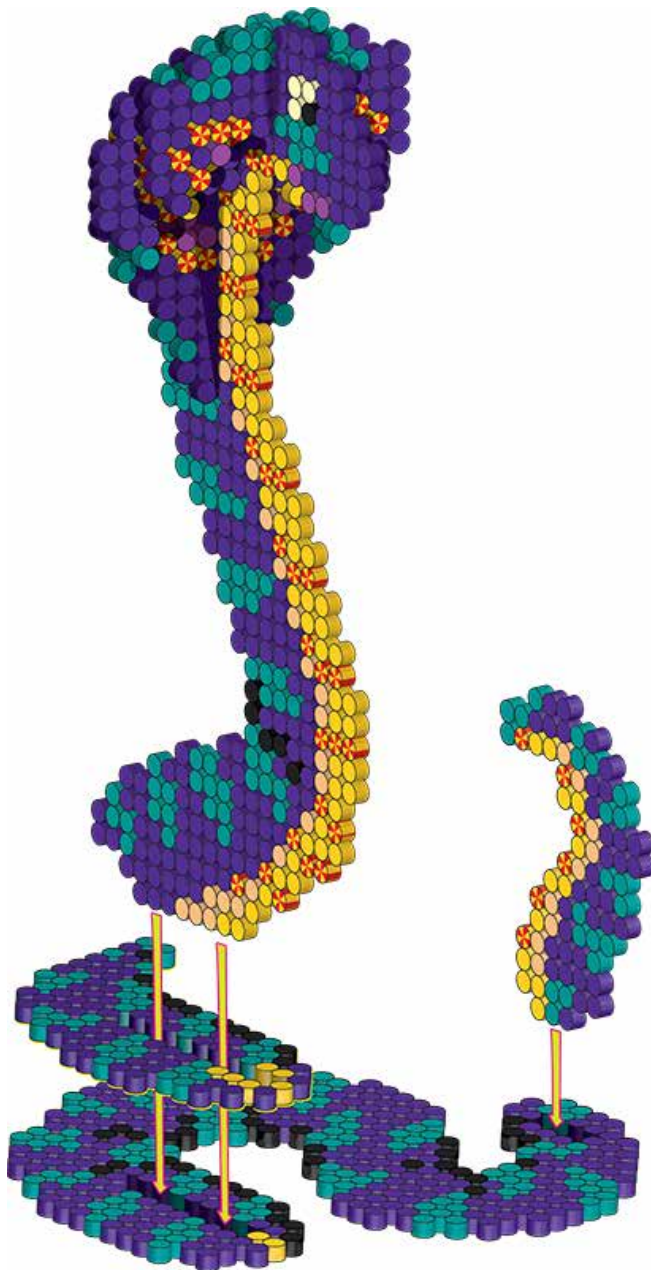

1 Hold the head/neck of your snake vertically with the head facing away from you so you are looking down on the head. This top view is what is represented in the diagram at the bottom.

See how the slots are labeled on the pattern on page 2. Insert the **A** pieces on either side of the head through the vertical slot A closest to the front of the head. The two **A** pieces will interlock. Repeat for the **B** pieces in the two B slots, and the **C** pieces in the four C slots.

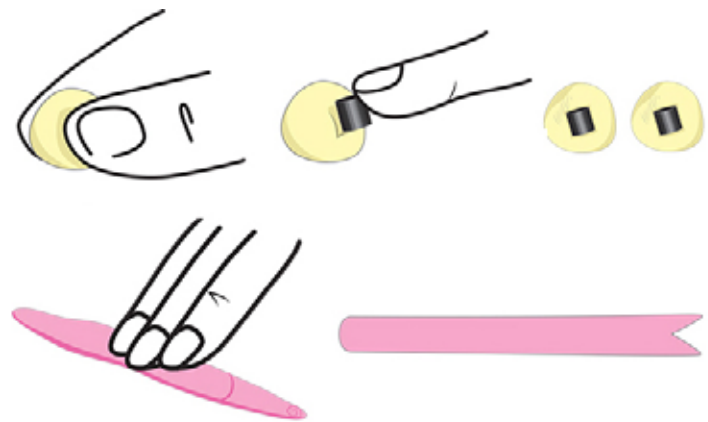

2 Align the Coil Top with the Coil base, then insert the snake's head/neck piece into the slot to a depth of two beads. This will hold the head erect.

Insert the tail into the other slot in the base.

3 Use light yellow paper clay to create 2 spheres approximately 1/2" in diameter. Push a black bead halfway into the center of each of the spheres.

For the tongue, create a long piece with pink paper clay and make it flat. Model it to the shape shown below with the forked end. Next, shape the length up and down as shown at bottom. Let dry.

4 After the clay is dry, glue the eyes and tongue into position as shown. Let the glue dry completely.
