Santa in the Chimney

YOU WILL NEED:

Pegboard:

Large square

Other:

Iron and ironing paper Tweezers

Glue gun

Wrapped candies

Bead Colors:

Sand - 12

Blush - 4

Red - 808

Gold Metallic - 10

Dark Green - 24

Light Grey - 542

Grey - 272

Black - 34

) White - 62

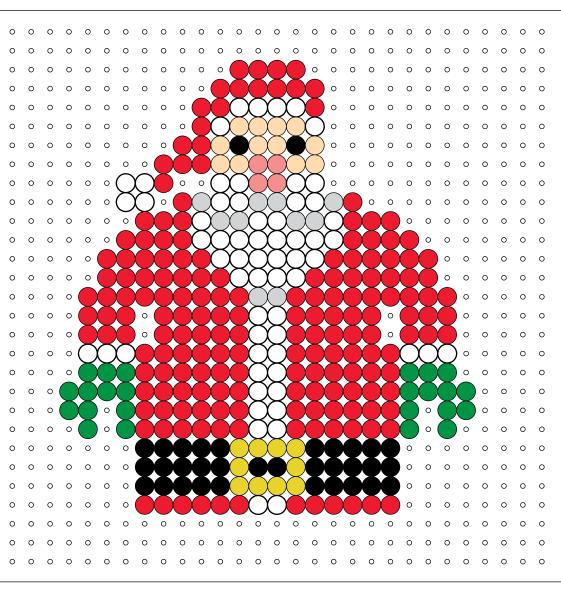

Instructions

- 1. If you are using a clear pegboard, slide the actual-size pattern underneath it. Place your beads on the pegboards as shown.
- 2. Ask an adult to fuse your designs—see page 3 for further instructions.

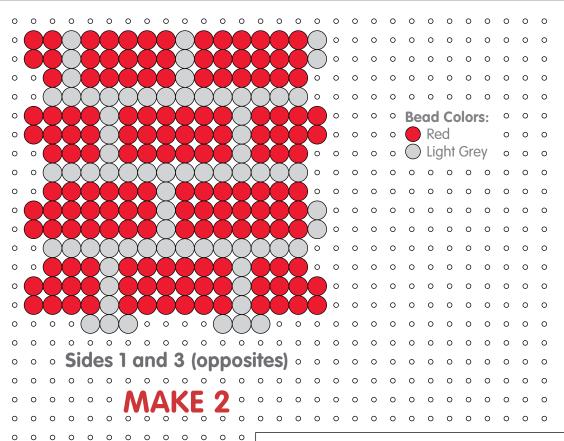

ASSEMBLY

Note: Use a glue gun (adults only, please) if needed to secure assembled pieces.

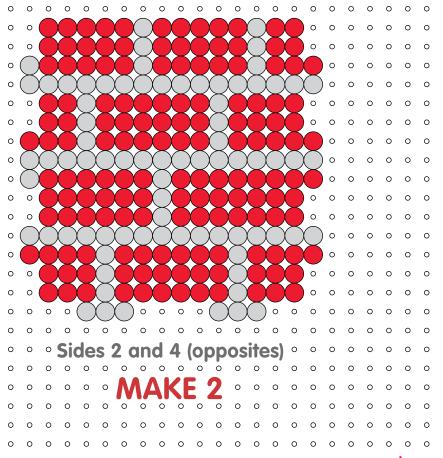

- 1. Assemble the chimney first as follows:
 - Aligning the tabs and slots, snap together side pieces 1 and 2, then add side 3 and 4.
 - Press the bottom piece onto the assembled sides.
 - Aligning the tabs and slots, snap together trim pieces 1 and 2, then add side 3 and 4. Hot glue the assembled trim piece to the top of the chimney.
- 2. Place Santa inside the chimney—his gloves fit over the chimney trim.
- Add your favorite wrapped candies to the container.

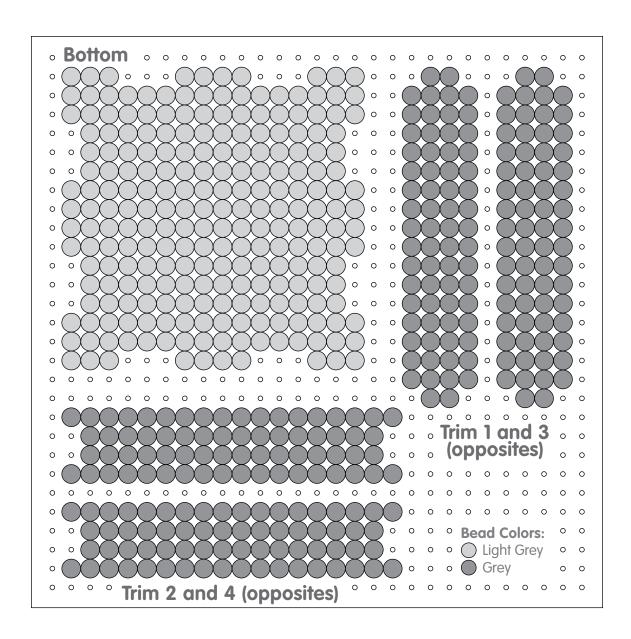

Fusing Instructions—Only Adults Iron

- 1. Place your pegboard on a flat, heat-safe surface.
- 2. Set a household iron to the medium setting. Place ironing paper over the pegboard. In a circular motion, begin to iron the project. Do not press down with the iron. As the beads begin to fuse, you will see circles of the beads start to show through the paper. When ironed properly, the beads will still have an open center. Let the design cool.
- 3. Remove the paper and bead design from the peg board. Flip the design over to expose the non-fused side. Repeat step two. Let cool completely. Your pegboard and ironing paper are reusable.

NOTE: Beads need heat for about 10-20 seconds per side to fuse evenly. Lift the paper occasionally to see how the beads are fusing. Depending on the size of the project, additional heating time may be required. DO NOT OVER-IRON the beads as it will make the centers of the beads close and can make the assembly you do with your project more challenging.
