

Santa Star Card

YOU WILL NEED:

Pegboard:

Large hexagon

Other:

Cardstock: dark red

Paper: lime green print, red, white

Tape runner

Quick-drying adhesive

Clear adhesive dots

Silver metallic pen

Bead Colors:

○ Peach - 26

○ Blush - 8

○ Red - 49

○ Cranapple - 16

○ Dark Blue - 2

○ Grey - 10

○ White - 136

○ Silver Pearl Stripe - 118

Instructions

1. Place your beads on the pegboards as shown. If you are using a clear pegboard, slide the actual-size pattern underneath it.
2. Ask an adult to fuse your designs—see page 2 for further instructions.

ASSEMBLY

1. Use the quick-drying adhesive to glue the mustache to Santa's face.
2. Fold a 6" x 12" piece of dark red cardstock in half to make a top-folding card.
3. Cut a 5 5/8" x 5 5/8" piece of lime green print paper and attach it to the center of the card front with the tape runner.
4. Add a 5 3/8" x 5 3/8" piece of red paper over the lime green print.
5. Position your Santa design as shown and attach it with clear adhesive dots. This will enable the design to be detached and used as an ornament by the one receiving the card.
6. Write the Ho! Ho! HO! message on the card front with a silver metallic pen.
7. Cut and attach a 5" x 5" piece of white paper for the inside of the card to continue your holiday message.

Fusing Instructions—Only Adults Iron

1. Place your pegboard on a flat, heat-safe surface.
2. Set a household iron to the medium setting. Place ironing paper over the pegboard. In a circular motion, begin to iron the project. Do not press down with the iron. As the beads begin to fuse, you will see circles of the beads start to show through the paper. When ironed properly, the beads will still have an open center. Let the design cool.
3. Remove the paper and bead design from the peg board. Flip the design over to expose the non-fused side. Repeat step two. Let cool completely.

NOTE: Beads need heat for about 10-20 seconds per side to fuse evenly. Lift the paper occasionally to see how the beads are fusing. Depending on the size of the project, additional heating time may be required. **DO NOT OVER-IRON** the beads as it will make the centers of the beads close and can make the assembly you do with your project more challenging.
