<span style="color: red;">●</span> Hot coral	x 24	<span style="color: lightgray;">●</span> Light gray	x 313
<span style="color: yellow;">●</span> Yellow	x 18	<span style="color: gray;">●</span> Gray	x 187
<span style="color: limegreen;">●</span> Prickly pear	x 8	<span style="color: darkgray;">●</span> Dark gray	x 275
<span style="color: green;">●</span> Kiwi lime	x 37	<span style="color: black;">●</span> Black	x 8
<span style="color: cyan;">●</span> Turquoise	x 2		

Insert the alien in the center hole in the spacecraft base. Add the legs in the other 4 holes. Flip the cup upside down and glue the base inside the opening of the cup.

Place the large ring over top of the cup and let it slide down until it rests in place. Place the dark gray ring around the cup bottom. Secure with glue if necessary to keep it in place.

For the top of the spacecraft, snap the antenna into the hole in the small circle. Glue the large circle to the cup bottom, then stack and glue the other circles on top.
